**TOSHIBA**

**Toshiba America Electronics Components, Inc.** , #3 supplier world wide of high quality semiconductor based products, SLC, MLC & embedded Nand flash, ASIC and founder services, microprocessors (ARM, RISC and CISC), discrete devices, microwave devices, multimedia components, Low & Med Power Mosfets, optoelectronics and high bright LEDs. System level solutions include TFT LCD displays.

**Micrel Semiconductor, Inc.**, Designs, develops, manufactures and markets a range of high-performance analog power integrated circuits, mixed-signal, High speed precision edge, RF and Ethernet based semiconductors.

**AKM Semiconductor, Inc.**, Designs, manufactures and markets advanced mixed-signal integrated circuits for telecommunications, multimedia, data acquisition, mass storage industries and pro & consumer audio markets.

**Lantronix, Inc.** is a provider of hardware and software solutions ranging from systems that allow users to remotely manage network infrastructure equipment to technologies that network-enable devices and appliances to leverage their serial interfaces and communicate over networks using popular network protocols.

**WTD** is in the development, manufacture and marketing of semiconductor laser diodes, LED, detectors, transmitter/receiver modules, transceivers for optical communication purposes and has the R/D, production and processing capabilities of complete series products from chips, devices to modules, basically covering the active modules for transmission and data communications at different rates and in different packages, which are mainly applied in backbone networks, access networks, MAN, CATV/CDMA, WLAN, etc.

**Excelsys** designs and manufactures modular switch-mode power supplies for a variety of markets including Wireless Communications, I.T., Industrial, Audio, Broadcast, Cable systems and Data Networks. There flexible AC/DC power solutions from 100 to 1200 watts. Whatever your requirement from 1.45 volts to 58 volts, 1 to 12 outputs, Excelsys has a solution.

**Teridian Semiconductor Corporation** designs and develops analog and mixed-signal Integrated circuits that play a primary role in converting the real world of temperature, light, and sound into digital signals used in a wide selection of applications such as electricity meters, point of sale terminals, alarms systems, satellite set top boxes, broadband networks and factory automation.

**VARTA Microbattery GmbH**, Over 115 years experience in engineering, manufacturing and sales of rechargeable and primary battery systems worldwide in technologies such as Li-Polymer, Ni-MH, Lithium, Silver oxide, and Alkaline, in button, cylindrical and prismatic form factors.

**Surge Components** supplies Aluminum Electrolytic, Film, and Multilayer Ceramic Capacitors in SMD, radial and axial packages. Surge is the North American marketing office for Lelon Electronics, a world class manufacturer of the Aluminum Electrolytic Capacitors.

**Silver Telecom, LTD.**, designs and manufacturers the latest Power over Ethernet (PoE), Telecom equipment and battery charger modules. The full Silver Telecom product offering includes PoE modules, SLIC & COIC (DAA and Trunk) devices and intelligent sealed lead acid battery charger modules.

**Kingston Technology Company** Designs and manufactures industry standard memory modules for processors, networking, and storage products for personal computers, workstations, laser printers and electronic devices.

**Kyocera Industrial Ceramics, Corp** A pioneer and technology leader in color STN and TFT LCD panels in both transmissive and transreflective technologies. Kyocera has an intense focus on industrial, instrumentation, hand-helds, medical and other low to medium volume markets makes Kyocera unique among liquid crystal display manufacturers.

**Dawar Technologies** Dawar provides Resistive, Capacitive, SAW and IR touch panels, membrane switches, graphic overlays, rubber keyboards, smart cards, all taking advantage of our years of digital printing expertise.

**Bear Power Supplies** designs and manufacturers a line of AC/DC supplies for commercial, Medical and Industrial use. All Bear power supplies meet industry standard certification requirements for performance and safety. They are TUV tested and carry the CE mark. Medical supplies are tested and certified to EN60601-1.2, UL 2601-1, CAN/CSA-C22.2, and IEC601-1/A2.

**Quicklogic Corporation** is the inventor and foremost provider of flexible semiconductor platforms for the hand-held mobile device market. Using our ultra low-power patented technology, QuickLogic supplies leading edge design solutions for the portable consumer, industrial, communications and security-intense military markets
